

FRONT OF ROOM

Location key example:
6-3 = plant is on Table 6 at position 3

6-11 Super Sweet 100 - *Solanum lycopersicum* 'Super Sweet 100'

Annual. Height 48-60". Spread 24-36". Sun. Soil moisture: medium. Small round 1 oz cherry tomatoes are deliciously sweet with a high vitamin C content; long clusters of fruits load up on tall, vigorous plants and bear fruit until frost; Indeterminate; 65 days

8-2 Sweet Million Cherry Tomato - HYBRID

Annual. Height 4'-5'. Spread 1.5'-2'. Sun. Soil moisture: medium. Indeterminate, 62 days to maturity. Bears fruit through the growing season, producing many clusters of 1/2", sweet, bright red fruit. Crack-resistant.

4-2 Tumbling Tom Tomato -

Annual. Height 12-24". Spread 12". Sun. Soil moisture: medium. Determinate bush plant for containers or hanging baskets. Cascading stems. Produces 1 to 2 inch sweet fruits. 68 days

7-13 Tomato Yellow Pear - *Solanum lycopersicum*

Annual. Height 60-72". Spread 24-36". Sun. Soil moisture: medium. Pear shaped fruit about 1.5 inches; heirloom selection, producing clusters of mild fruit; Indeterminate; 80 days.

Squash/Cucumber

1-1 Early Prolific Squash - HEIRLOOM

1-2 Waltham Butternut Squash - HEIRLOOM

1-4 Golden Zucchini summer squash

2-5 Dark Green Zucchini summer squash

7-14 Lemon cucumber

5-5 Juliet

Annual. Height 3'-5'+. Spread 1'-2'. Sun. Soil moisture: medium. Indeterminate. Elongated, 1 oz. cherry tomatoes in grape-like clusters. Crack-resistant fruits with sweet flavor. 60 days.

5-3 Little Ruby Jean Micro-Dwarf - *Solanum lycopersicum*

Annual. Height 8-10". Sun. Soil moisture: medium. Prolific micro-dwarf; produces red cherries with excellent sugar and acid flavor; good disease resistant and heat tolerant

5-1 Mortgage Lifter - *Solanum lycopersicum*

Annual. Height 6'. Spread 3-4'. Sun. Soil moisture: medium. Indeterminate; 80 days to harvest. Tasty sweet, very large fruit with low acid content

7-8 Precious Pink Tomato - HYBRID -

Annual. Height 3-6'. Spread 2-2.5'. Sun. Soil moisture: medium. Pink tomatoes, 6 to 8 ounces, with juicy flesh. Resistance to Tobacco Mosaic Virus and Fusarium wilt. Indeterminate. 72 days.

5-8 Rapunzel Tomato -

Annual. Height 3-6'. Spread 3-4'. Sun. Soil moisture: medium. Indeterminate; For containers or small garden. Produces fruiting branches with up to 40 small sweet fruits. 68 days

2-4 Roma VF Tomato - HEIRLOOM

Annual. Height 2'-3'. Spread 1'-2'. Sun. Soil moisture: medium. Determinate. 85-90 days to maturity. Seeds produce a heavy yielding tomato variety commonly used in tomato paste and puree.

6-1 Spunky Bird Dwarf to Micro-Dwarf Red - *Solanum lycopersicum*

Annual. Height 20". Sun. Soil moisture: medium. Early dwarf; produces scarlet red large cherry to cocktail sized fruits, 1-2 oz; can also be grown as a micro-dwarf in a 1 gal pot; good heat/humidity tolerance as well.

3-5 Sugar Baby Tomato -

Annual. Height 18-24". Spread 12". Sun. Soil moisture: medium. Extremely early harvests on compact plants. The 1 to 2 oz. tomatoes have a sweet flavor. Good for containers or small gardens. Determinate. 54 days.

7-3 Sugary Tomato - HYBRID

Annual. Height 4'. Spread 2'. Sun. Soil moisture: medium. Semi-indeterminate. 60 days to maturity. Sweet cherry fruits are oval-shaped and produced in clusters.

8-4 Chef's Choice Red Tomato - Hybrid

Annual. Height 3-5'. Spread 24". Sun. Soil moisture: medium. Beefsteak with firm flesh, about 8 ounces. Balanced flavor. Good disease resistance. Indeterminate. 80-85 days.

6-4 Celebrity Plus Hybrid - *Solanum lycopersicum*

Annual. Height 3-5'. Spread 4'. Sun. Soil moisture: medium. Improved disease resistance; smooth red fruits are larger than the original Celebrity, weighing in at 7-8 oz; determinate; 80 days

3-4 Cherry Princess Tomato - HYBRID

Annual. Height 4'-6'. Spread 2'-3'. Sun. Soil moisture: medium. Indeterminate. Produces masses of 1-1.5" cherry shape fruits throughout summer. Firm texture, great for salads. 57 days to maturity.

7-1 Early Girl - *Solanum lycopersicum*

Annual. Height 3-5'. Spread 4'. Sun. Soil moisture: medium. Hybrid VFFNT; huge yields on such small plants; 6-7 oz fruit; compact; determinate; 55 days

7-5 Early Wonder Tomato - HEIRLOOM

Annual. Height 4'. Spread 2'-3'. Sun. Soil moisture: medium. Indeterminate. Early maturing, compact variety. 6 oz. fruits with excellent flavor. Great for slicing and salads. 57 days to maturity.

5-9 and 1-3 Everglade Tomato - HEIRLOOM

Annual. Height 8'. Spread 3-4'. Sun. Soil moisture: medium. Tough selection that thrives in heat and humidity. Produces small, 1/2 inch wide fruit. Indeterminate. 80 days

6-5 Fat Frog Micro-Dwarf Yellow - *Solanum lycopersicum*

Annual. Height 12-14". Spread 24". Sun. Soil moisture: medium. fruit has green flesh when ripe with a pale yellow skin; sweet flavor with a tang; good tolerance to heat and humidity

7-11 Florida Petite Micro-Dwarf Red - *Solanum lycopersicum* 'Micro-Tom'

Annual. Height 20". Spread 1.5". Sun. Soil moisture: medium. Created at the University of Florida in the early 1980s; produces red cherry fruits of variable sizes; strong taste, not sugary; 60-70 days

2-6 Gumbrow Brown tomato - HYBRID

Annual. Height 3-5'. Spread 3-4'. Sun. Soil moisture: medium. A cherry tomato with 1-inch brown-striped fruits. Indeterminate. 70 days

Tomatoes

6-13 **Beefmaster Tomato - HYBRID**

Annual. Height 6'-8'. Spread 2'-3'. Sun. Soil moisture: medium. Indeterminate. Popular beefsteak type tomato. Large fruits with little cracking. Great for slicing, sauces, salsa, and soups. 80 days to maturity.

5-11 **Beefsteak Tomato – HEIRLOOM**

Annual. Height 36-42". Spread 18". Sun. Soil moisture: medium. Large, ribbed fruits, 1-2 lbs. each, are produced on indeterminate vines. 80-90 days.

6-8 **BHN 602 Hybrid - *Lycopersicon esculentum* 'BHN 602'**

Annual. Height 36-48". Spread 24-36". Sun. Soil moisture: medium. Extra-large, bright red tomatoes weigh 10 to 12 oz; fruit shaped like perfectly smooth globes; for slicing and canning; determinate 75 days.

7-6 **Birdie Rouge Red - *solanum lycopersicum***

Annual. Height 12". Spread 20-30". Sun. Soil moisture: medium. red cherry shaped fruits with thin skin and strong sweet flavor; early season producer; from the Netherlands

3-6 **Bunny Hop Aztek Mirco-Dwarf Yellow Tomato**

Annual. Height 1'-1.5'. Spread 0.5'. Sun. Soil moisture: medium. Determinate. Canary yellow fruits about 1" diameter, shaped like a small peach. Excellent for salads. Can grow in 1 gallon pot.

3-1 **Bunny Hop Baby Micro-Dwarf Red Tomato -**

Annual. Height 0.4'. Spread 0.5'. Sun. Soil moisture: medium. Determinate. 4" tall, easily grown in pot. Red fruits are heart-shaped, with firm texture for salads.

6-2 **Bush Early Girl - *Solanum lycopersicum***

Annual. Height 30-36". Spread 24-30". Sun. Soil moisture: medium. Determinate; matures in 54 days; perfect for containers; high yields; resistant to (v), (F1 & F2), (n), (t)

2-3 **Candyland Red Tomato -**

Annual. Height 3-5'. Spread 3-4'. Sun. Soil moisture: medium. Bushy habit that produces ½ inch round, red fruits with a currant flavor. Indeterminate. 55 days.

Annual. Height 18-30". Spread 24-36". Sun. Soil moisture: medium. Thick walled peppers grow 3 inches long and 1.5 inches wide, with rounded tips; dark green at first, then turning red; hot flavor; 75 days

5-7 Jimmy Nardello Italian Sweet Pepper - *Capsicum annuum*

Annual. Height 18-30". Spread 24-36". Sun. Soil moisture: medium. Long, thin-skinned frying pepper; ripens to deep red; very prolific; 75 days

6-12 King Arthur Pepper - HYBRID

Annual. Height 2'. Spread 1'. Sun. Soil moisture: medium. Sweet bell pepper, maturing from green to red. Large, blocky fruits 4.5" long. 62 days to maturity.

7-9 Mammoth Pepper - HYBRID

Annual. Height 2'. Spread 1.5'. Sun. Soil moisture: medium. Large 4" long medium-hot jalapeno fruits with smooth skin and thick flesh. Great for salsa and dips. 72 days to maturity.

7-10 Red Knight

Annual. Height 18"-24". Spread 12"-20". Sun. Soil moisture: medium. Big, blocky sweet peppers, 4 1/2" long and wide. Turn red early in season. 65 days to green, 78 days to red.

8-1 Sweet Banana

Annual. Height 2-3'. Spread 1'-1.5'. Sun. Soil moisture: medium. Hungarian wax peppers are 6-7" long. Matures in 60 days to yellow, 75 days to red-orange. Produces through summer.

4-1 Sweet Bella Pepper-

Annual. Height 18-30". Spread 12". Sun. Soil moisture: medium. Blocky fruit with large yields and disease resistance. The 4 to 4 1/2 inch fruit ripen from green to red with thick walls. 73

8-3 Tam Jalepeno Pepper - Hybrid -

Annual. Height 18-36". Spread 16-24". Sun. Soil moisture: medium. A little less potent than other Jalepenos. Fruits are 3 inches, dark green and shiny. Plants have some disease resistance. 70 days

5-6 **Sweet Basil – *Ocimum basilicum***

Annual. Height 12"-18". Spread 10"-14". Sun. Soil moisture: medium. Classic herb used in tomato sauce, pesto, and salad. Grow in well drained soil with regular watering. May be damaged by temperatures below 50F.

8-5 **African Blue Basil**

Annual. Height 1-3'. Spread 1-3'. Sun. Soil moisture: medium. Sterile hybrid. Leaves have a camphor flavor and scent

Peppers

2-1 **Anaheim Chili Pepper - *Capsicum annuum***

Annual. Height 24-36'. Spread 18-24'. Sun. Soil moisture: medium. Abundant large fruit, 6-8 inches long with a medium heat level and rich flavor. Good for drying; 80 days until maturity

3-2 **Better Belle II Pepper -**

Annual. Height 18-30". Spread 12". Sun. Soil moisture: medium. Thick-walled, 4-lobed fruit are 4 inches tall and 5 inches wide. Start green but matures to shiny red. Vigorous plants are Tobacco Mosaic Virus resistant. 75 days

7-2 **California Wonder - *Capsicum annuum***

Annual. Height 18-30". Spread 24-36". Sun. Soil moisture: medium. Heirloom bell pepper; perfect stuffing pepper; tender and flavorful; 75 days

7-12 **Chinese Giant**

Annual. Height 24"-32". Spread 12"-18". Sun. Soil moisture: medium. Compact, bushy plant produces large, 4"-6" blocky red fruit with sweet flavor. Regular watering for best production. 90 days.

7-7 **Cubanelle**

Annual. Height 2'. Spread 1'. Sun. Soil moisture: medium. Sweet yellow-green pepper, 5" long, changes to orange-red while ripening. Thin walled fruit great for cooking. 65 days to maturity.

6-9 **Giant Red Marconi Red Pepper - HEIRLOOM**

Annual. Height 1.5'-2.5'. Spread 1'. Sun. Soil moisture: medium. Italian pepper produces heavy yields of 12" long, sweet fruits. 70-90 days to maturity.

5-4 **Jalapeno - *Capsicum annuum 'Jalapeno'***

5-5 Juliet

Annual. Height 3'-5'+. Spread 1'-2'. Sun. Soil moisture: medium. Indeterminate. Elongated, 1 oz. cherry tomatoes in grape-like clusters. Crack-resistant fruits with sweet flavor. 60 days.

5-3 Little Ruby Jean Micro-Dwarf - *Solanum lycopersicum*

Annual. Height 8-10". Sun. Soil moisture: medium. Prolific micro-dwarf; produces red cherries with excellent sugar and acid flavor; good disease resistant and heat tolerant

5-1 Mortgage Lifter - *Solanum lycopersicum*

Annual. Height 6'. Spread 3-4'. Sun. Soil moisture: medium. Indeterminate; 80 days to harvest. Tasty sweet, very large fruit with low acid content

7-8 Precious Pink Tomato - HYBRID -

Annual. Height 3-6'. Spread 2-2.5'. Sun. Soil moisture: medium. Pink tomatoes, 6 to 8 ounces, with juicy flesh. Resistance to Tobacco Mosaic Virus and Fusarium wilt. Indeterminate. 72 days.

5-8 Rapunzel Tomato -

Annual. Height 3-6'. Spread 3-4'. Sun. Soil moisture: medium. Indeterminate; For containers or small garden. Produces fruiting branches with up to 40 small sweet fruits. 68 days

2-4 Roma VF Tomato - HEIRLOOM

Annual. Height 2'-3'. Spread 1'-2'. Sun. Soil moisture: medium. Determinate. 85-90 days to maturity. Seeds produce a heavy yielding tomato variety commonly used in tomato paste and puree.

6-1 Spunky Bird Dwarf to Micro-Dwarf Red - *Solanum lycopersicum*

Annual. Height 20". Sun. Soil moisture: medium. Early dwarf; produces scarlet red large cherry to cocktail sized fruits, 1-2 oz; can also be grown as a micro-dwarf in a 1 gal pot; good heat/humidity tolerance as well.

3-5 Sugar Baby Tomato -

Annual. Height 18-24". Spread 12". Sun. Soil moisture: medium. Extremely early harvests on compact plants. The 1 to 2 oz. tomatoes have a sweet flavor. Good for containers or small gardens. Determinate. 54 days.

7-3 Sugary Tomato - HYBRID

Annual. Height 4'. Spread 2'. Sun. Soil moisture: medium. Semi-indeterminate. 60 days to maturity. Sweet cherry fruits are oval-shaped and produced in clusters.
